

Raw materials resourcing - Material properties for durable plasters and ceramics, and craftspeople's technological choices.

Friday, 25th February 2022

Division Geology, Earth and Environmental Sciences, Katholieke Universiteit Leuven

(Please note that the time of lectures is provided in CET (UTC +1), Brussels, Belgium)

10:00-11:20 Clay, lime, stone... an introduction to the mineralogy and chemistry of raw materials for ceramic and plaster production

Prof. Patrick Degryse
KU Leuven, BE

11:20-11:50 Coffee Break

11:50-13:10 Experiments on material properties in pottery production

Dr. Dennis Braekmans
Universiteit Leiden, NL

13:10-14:00 Lunch Break

14:00-15:30 Exercises in ceramic and plaster raw material characteristics

Prof. Patrick Degryse
KU Leuven, BE

All lectures will be delivered online, and include ample time for discussion.

Participants must register in advance for this training course, following the link below:
